- Español | Native
- Inglés | Advanced

OBJECTIVE

Software developer passionate about creating technological solutions, with experience in collaborative work and a solid knowledge in databases and systems architecture.

EXPERIENCE

FULL STACK DEVELOPER

Cenfotec. San Pedro, Costa Rica | May 2023 - Present

- Automation & Scripting: Developed scripts using Python to automate tasks such as data processing, testing, and deployment in Docker-based environments.
- Infrastructure & DevOps: Experience working with Linux operating systems and containerization using Docker. Familiar with version control and CI/CD pipelines using tools like GitHub Actions and Jenkins.
- Incident Support & Troubleshooting: Gained experience identifying and solving backend issues during development and testing. Applied debugging techniques and log analysis to fix errors and improve system reliability.
- Collaborative Development: Contributed to full-stack web applications using Spring Boot, React, and SQL Server, following MVC architecture and REST API principles in team-based university projects.
- Cloud & Systems Knowledge: Understanding of cloud computing fundamentals and basic concepts of system reliability, monitoring, and alerting through coursework and personal study.

EDUCATION

BACHILLERATO EN INGENIERÍA EN SOFTWARE

Universidad Cenfotec. San Pedro, San Jose | May 2023 - Present
